READINESS PROGRAMME OBJECTIVES

OBJECTIVE 3: NATIONAL ADAPTATION PLANS & ADAPTATION PLANNING PROCESSES (1)

GCF recipient countries establish integrated adaptation planning and monitoring systems to enable climate resilience across sectors, as well as strengthen impact and catalyze the scale of public and private adaptation finance, based on strong climate rationale and active stakeholder engagement.

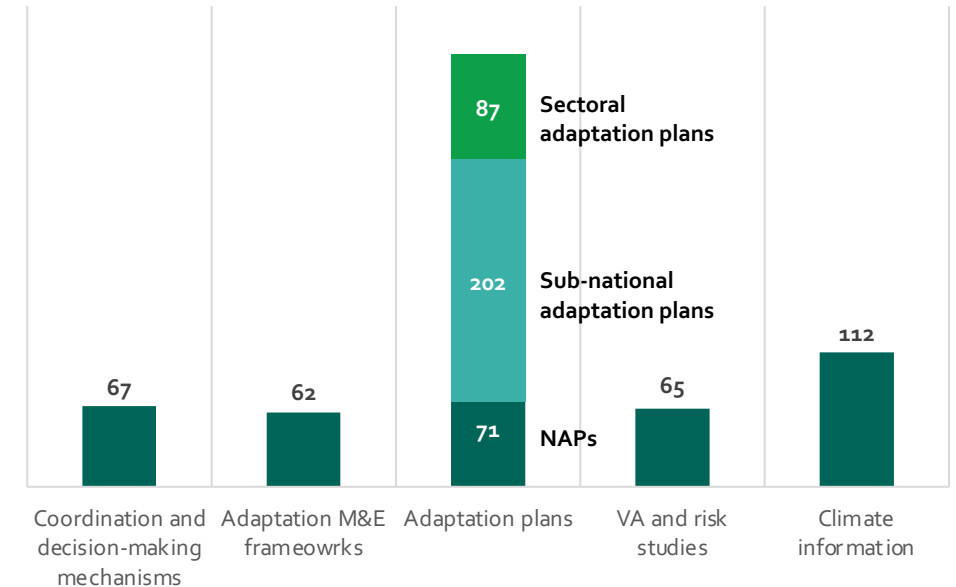

Objective 3

3.1 Adaptation planning governance and institutional coordination strengthened

3.2 Evidence produced to design adaptation solutions for maximum impact

- Inter and intra- institutional coordination and decision-making mechanisms
- Stakeholder engagement frameworks and agreements
- Adaptation impact monitoring, evaluation and learning systems
- National, sub-national and/or sectoral plans
- Climate hazard impact, vulnerability and risk studies
- Consolidation and sharing of climate studies
- Communication to relevant public, private and civil society decision-makers and other stakeholders
- Policy and regulatory frameworks

Adaptation Planning Expected Results (1)

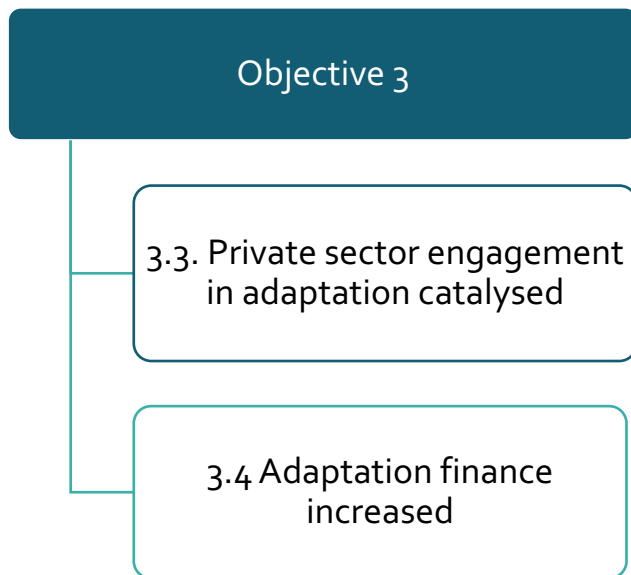

*Expected results under Objective 3 are generated from all the approved adaptation planning proposals since 2016

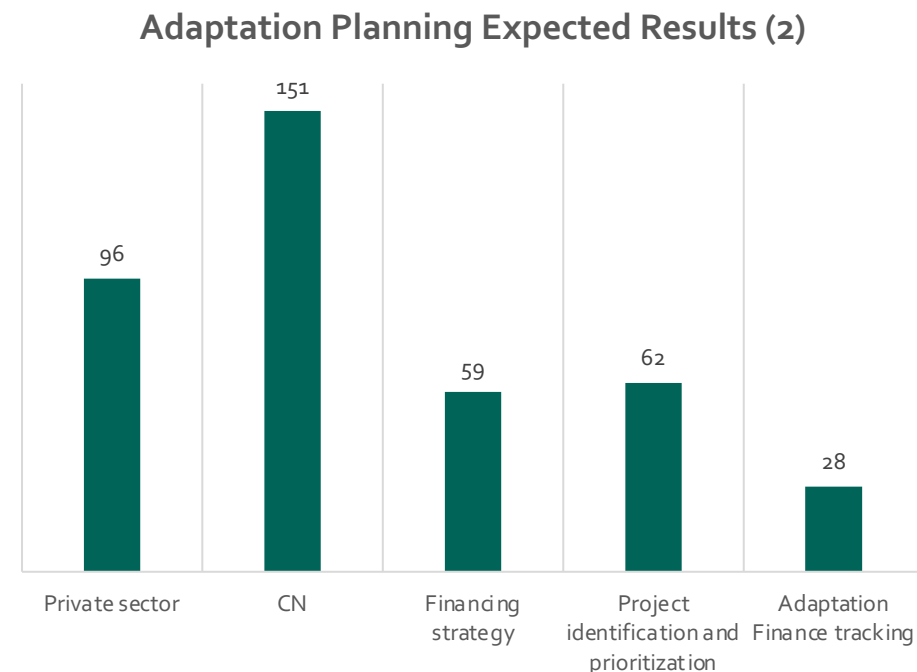

OBJECTIVE 3: NATIONAL ADAPTATION PLANS & ADAPTATION PLANNING PROCESSES (2)

GCF recipient countries establish integrated adaptation planning and monitoring systems to enable climate resilience across sectors, as well as strengthen impact and catalyze the scale of public and private adaptation finance, based on strong climate rationale and active stakeholder engagement

- Policy guidelines or regulations to remove barriers and incentivize adaptation investment
- Private sector actors engaged in national, sectoral and/or sub-national adaptation planning
- Adaptation planning for climate resilience of individual businesses and supply chains
- Matching private financiers with solutions
- Project and programme concept notes
- Financing strategies for specific adaptation priorities
- Systems for prioritizing adaptation project / programme ideas
- Systems for tracking finance

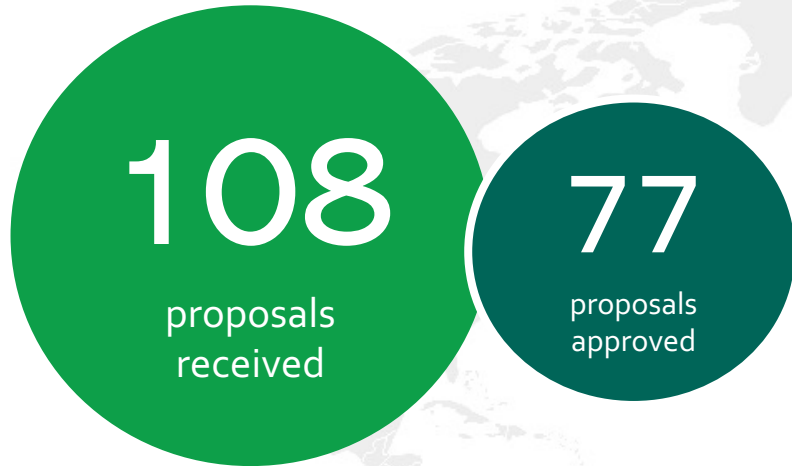

*Expected results under Objective 3 are generated from all the approved adaptation planning proposals since 2016.

ADAPTATION PLANNING APPRAISAL CRITERIA

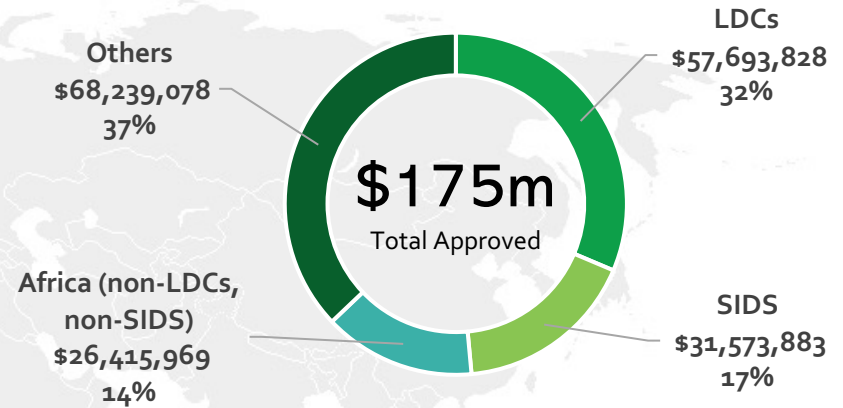

NAP PIPELINE AND PORTFOLIO OVERVIEW

AS OF 8 DECEMBER 2021

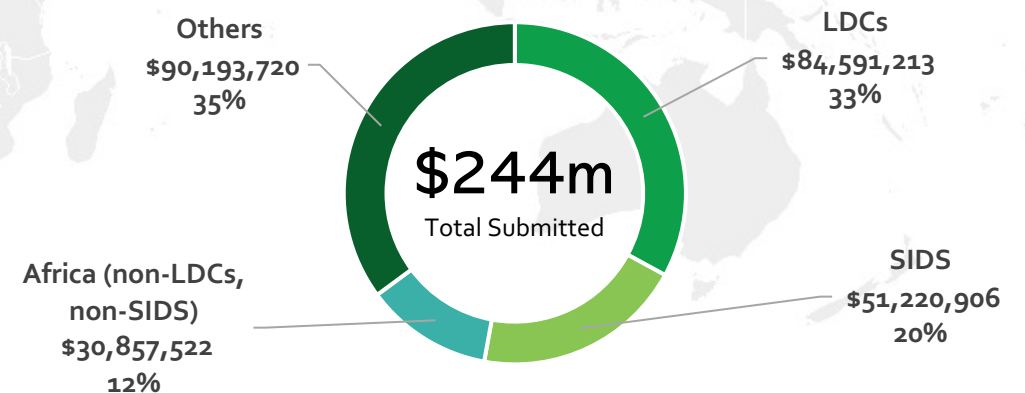

Status	# of proposals	USD Value
Total	108	244 m
Approved	77	175 m
Various stages of review	31	74 m

Breakdown of Approvals (LDCs, SIDS, Africa)

Breakdown of Submissions (LDCs, SIDS, Africa)

MAINTAINING PROGRESS ON NAP DURING THE COVID-19 PANDEMIC

Strategies:

- TA Support – consultants available
- Encouragement to NDAs to utilize national/regional Delivery Partners; greater likelihood of understanding local context and formulating transformational adaptation planning processes.
- Multiple sequential proposals – flexibility to address urgent matters, better manage capacity for implementation, apply lessons learnt from previous iterations
- Improved turnaround time for 1st submissions (within 40 working days)
- Regular follow-up once review sheets are shared; open lines of communication
- Technical clearance meetings scheduled weekly

PROJECT DISTRIBUTION AND RESULTS

No. of projects

190

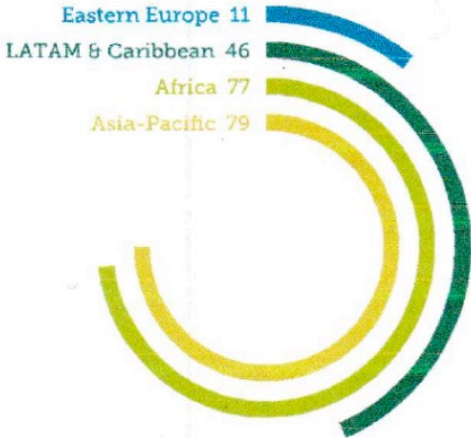

Anticipated number of people with increased resilience

612m

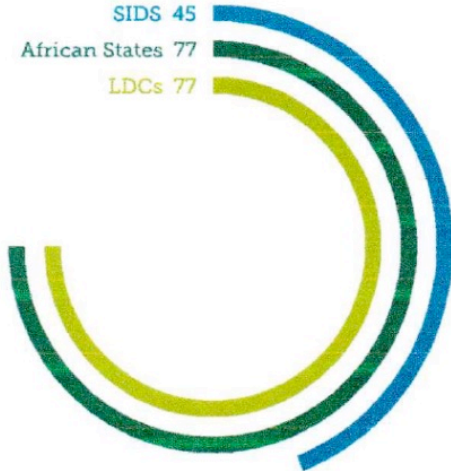

Anticipated tonnes of CO2 equivalent avoided
